

Questions and Answers

From our Website – www.worldsbesthoofoil.com and answered by our resident Master Farriers, or our team at head office.

Q. What is in the Worlds Best Hoof Oil ?

A. ALL ingredients are 100% PURE and they include, NEATSFOT, WOOD/ STOCKHOLM TAR, SALIGARI OIL, SILICONE, EUCALYPTUS OIL, and it is the combinations of several special species that formulate the Worlds Best Hoof Oil. We do not use fillers and we do not dilute any of the oils / ingredients.

Q. Do you need to use the Oil every day?

A. NO, under normal hoof and weather conditions, unless your horse is very hard working, you use Worlds Best Hoof Oil as you would with any other standard oil / grease / lard, however, the more frequently you use it, the better the growth and condition of the hoof.

Q. My horse does not have a stable and lives in a large open paddock. He has a very bad split on one front hoof, and one rear has been broken away on rocks, will the oil help that?

A. YES, providing the horse does not have a birth defect, the use of the Worlds Best Hoof Oil will aid QUICKLY in the regrowth of a Strong and Healthy hoof. We have many testimonies where paddocked horses have had splits for years, and where the farrier will "V" the split on every regular visit, even going as far as using side clip shoes to help hold the hoof together, and still not have the split grow out/repair. Then turn to using Worlds Best Hoof Oil only once a day (for the first 2 weeks only) and the hoof will totally repair and grow out in as little as 6 weeks, where the splits WERE 1/2 the way up to the coronet band. FANTASTIC RESULTS!

Q. Why does your oil work so well?

A. It is a combination of the special formula and because the oil is quickly absorbed by the hoof, rather than laying on the top of the hoof.

Q. How will I know, and how long does it take for the oil to help?

A. Within 7 to 10 days if you follow label instructions, there will be no question you will see improvement and your horses hooves will become Stronger, Healthier, and he will be far more comfortable in his gait, if this has been changed because of soreness from damaged hooves – Guaranteed ... with pro rata MONEY BACK offer.

Q. I live in a very hot and dry area, the horse is not stabled; will it work well here?

A. YES. The formula contains silicone amongst other ingredients that help keep the hoof from being "drained" of moisture and goodness.

Q. Does your oil work in the Wet Season / Winter or on flood irrigation?

A. YES. The silicone helps and aids in the protection and "waterproofing" (yet allowing it to breathe) of the hoof and therefore your horse is more comfortable. It is critical that your horses hoof is maintained year round, and throughout all seasons – In Wet or Dry conditions.

Q. I have used your excellent product already. I have just purchased a pony for the ring that has terrible feet and I need her ready really quickly. If I oiled her three times a day and put a thicker layer on, will it work quicker?

A. NO. You would be wasting both your time and money. In the most severe cases, use the product only twice a day for the first 7 – 14 days, oiling the entire hoof and paying particular attention to the coronet band, then, once a day for the next 30 days. Then use the Worlds Best Hoof Oil as you would any other standard hoof product you have used in the past. The best guide to how often you

need to use the product is your horses' general health, and the conditions of the ground it works on. Finally, unlike most lanolins/lards/greases etc., it goes to work quickly and doesn't get the chance to rub or brush off (or sit there for days), more importantly, what goes on, helps keep the foot moist and doesn't go to waste, Summer or Winter. When you go to your Chemist or Drug Store and purchase a vitaminE cream, you want a formula that goes to quickly and go to work. As with VitaminE cream and the skin, you can assist Mother Nature in regeneration, but you cannot "force feed her" and so it is with the hoof.

Q. Where do I oil the hoof?

A. There is three parts to this question. (1) The growth of the hoof comes in main from the coronary band (coronet band) therefore, pay particular attention to this area including just above it, where the hairline finishes. Oil the coronet band and surround. (2) What you want to achieve is to have the entire hoof as healthy and pliable as Mother Nature can give, so it will not be brittle when walking over rough surfaces (unshod) or indeed, when under stress, pressure is placed between the hoof, the nails and the shoe. Oil the entire front of the hoof. (3) A hoof similar to the photo testimonials, or where a horse is under heavy daily stress (working horses, all areas) it is best for both the top and the bottom of the hoof to be oiled. Providing your horse does not have a genetic or over all health / hoof related problem, following these three basic steps will have your horses' hooves healthy – MONEY BACK guarantee.

Q. My horse is an aged mare, will it help her feet and will it work on her last foal?

A. YES. From foals to aged stock, – Money back guaranteed.

Q. I have a couple of Show Donkeys, is the oil suitable for them?

A. YES. With the natural ingredients and pure oils used, it will provide outstanding results for you, PLUS, you have the added exclusive ingredient of Saligari oil and silicone to protect in both Summer and Winter. You will obtain magnificent results.

HOOF Oil

Used and recommended
worldwide by Master Farriers
and Equine Practitioners

"Far more than just a hoof dressing"

"In my days work, I shoe and trim a wide range of horses and foals around the world. In my experience, the daily use of the Worlds Best Hoof Oil promotes up to 30% faster, healthier and stronger hooves than any other product I have seen in my working life. THE RESULTS SPEAK FOR THEMSELVES. For normal upkeep, or, if you have a hoof problem with any horse, from the racetrack, mountain country, or even the family pony, then I use and would recommend this product."

Testimony's from the many held at our offices

ANTHONY THOMAS

One of Australia's most respected International riders & proprietor of SOUTHERN SPORT HORSE Education & Sales complex S.A.

Anthony says "Since I began using Worlds Best Hoof Oil, gone are the days where I have had to worry about the condition of all my horses hooves each day, or the shoes falling off.

All the Splits and Cracks have gone and the hooves are now Strong and Healthy and as an added bonus my Farrier couldn't be

happy because he keeps telling me it's not only the hooves that are great but his rasp and equipment are lasting longer. I tell all my friends and colleagues they should be using Worlds Best Hoof Oil!"

Anthony

MARGARET DALTON

2005 H.R.C.A.V.L4 State Champion Rider & 2005 Worlds Best Hoof Oil State Navigation series Winner (co rider Vicki Jerman)

Margaret says "Since we began with Worlds Best Hoof Oil my horses hooves have always been in good condition, those nasty sand/grass splits have all gone, the shoes do not fall off. It is so easy to use and goes much further than anything else I have used it makes it very economical as well so if there is a Dressage, Show Jumping, Cross

Country or Navigation event or simply a work out I can rely on the feet being 100% in good condition, thanks to Worlds Best Hoof Oil and I love the Show Gloss dressing for the Show Ring and Dressage"

Margaret

ROBERT GREIVE

Iconic Local Thoroughbred Trainer

Robert says "My good racemare Fearless Sophie always suffered from poor feet and concussion. I started to use Worlds Best Hoof Oil and she went on to WIN a CUP and BLACK TYPE prizemoney for me and some of the races were on flint hard tracks. Worlds Best Hoof Oil is well named."

Bob Greive

TYANNA LAWLESS

F.E.I. Dressage Competitor

Tyanna says "No hoof No Horse". Using Worlds Best Hoof Oil keeps my horses hooves in prime condition regardless of climatic seasons. Traveling 5000 kms West to East to compete I need to make sure that my horse's feet are healthy and in prime condition to ensure I have a horse ready to compete when I arrive." Tyanna
